

GreenPlan

LeasePlan understands that, as a global leader in the transport industry, it has obligations. In Australia, LeasePlan has partnered with Greenfleet to develop GreenPlan.

GreenPlan has been developed primarily to help fleet managers, but the advice it provides is just as relevant to a single driver as it is to a fleet manager in charge of thousands of vehicles.

GreenPlan works on three principles; Avoid, Reduce and Offset CO₂-e emissions. By adopting all or some of the following principles, you will ensure that you are enhancing the environmental and financial performance of your fleet.

Our comprehensive [GreenPlan site](#) provides thorough information about how you can Avoid, Reduce and Offset your fleet's emissions. The site also provides access to green driving tips, green tree totaler, green car reviews and the green vehicle guide.

LeasePlan is a proud Foundation Supporter of Greenfleet, having supported the organisation's growth since its inception.

Greenfleet is a not-for-profit organisation, an Approved Abatement Provider under the Department of Climate Change's Greenhouse Friendly™ program and a key partner in our GreenPlan offering.

Greenfleet offsets greenhouse gas emissions by planting forests that soak up carbon dioxide from the atmosphere. Their forests are made up of a wide variety of Australian native trees that also help to reduce soil erosion, improve water quality and provide habitat for native animals.

For more information about GreenPlan or to find out how you can Avoid, Reduce and Offset your fleet visit our [GreenPlan site](#) or contact LeasePlan on 135 752.
